EverGreen<sup>®</sup> 100 Synergized ULV Concentrate is a broad spectrum, pyrethrum-based insecticide designed for use when animals are present.\* EverGreen 100 is labeled for livestock premise and outdoor areas to kill flies and other listed insects.

- Synergized Pyrethrum Concentrate
- Kills and Repels Flies
- Quick Knockdown
- For Use in Livestock & Poultry Houses
- For Use Outdoors

## Product Specifications

<b>Signal Word</b>	Caution
<b>Packaging</b>	Gallons (4 per case), 55 Gallon Drums
<b>EPA Registration Number</b>	1021-1310
<b>Stability of Undiluted Product</b>	Stable
<b>Stability of Diluted Product</b>	Agitation recommended; not required. If left diluted in tank, make sure to agitate before reuse
<b>Appearance</b>	Clear yellow to amber brown liquid
<b>Odor</b>	Solvent odor
<b>Active Ingredients</b>	Pyrethrins, PBO
<b>Flammability</b>	OSHA – combustible liquid
<b>Mode of Action</b>	Sodium channel modulator – disrupts insects’ nervous system
<b>Class of Chemistry</b>	Pyrethrins and insecticide synergist
<b>Respirator Required</b>	Required for hand-held fogging devices in enclosed areas
<b>Mix or Dilute in</b>	Use undiluted or dilute in oil only (refined kerosenes as defined by CFR Title 21, 172.884)
<b>Activity</b>	Flushing action and quick knockdown; kills by contact
<b>Shelf Life</b>	3 years or more when stored in original commercial packaging at room temperature

## Use Areas

### Indoor Use

- Dairy and Livestock Barns
- Kennels
- Poultry Houses
- Meat and Poultry Processing Plants
- Stables
- Zoos

### Outdoor Fogging

\*Do not apply directly to animals.

## Method of Application

- Conventional mechanical foggers (space spray)
- Handheld mechanical foggers
- Compressed air sprayers (surface spray)
- Aerosol generators (space spray)
- Thermal foggers
- Broadcast surface treatments
- ULV cold foggers

## Best Practices when using EverGreen® 100 Synergized ULV Concentrate

### Animal Premise Applications

Direct spray toward the upper portions of the enclosure above the animals, filling the room with a fine mist or fog.

### Mixing Tip

When mixing add the concentrate first, than dilute with oil, then agitate. If there is good agitation in the mixing tank or unit, then the mixing order is not as important. Diluted product may look hazy. Keep product agitated as much as possible.

### Contains petroleum distillates

Do not treat lawns, turf or plants. Do not treat surfaces that may be stained.

### Ventilate before re-entry

Ventilation is achieved by completely exchanging air in the room or area 3 times.

## Key Insects Controlled

Ants (Black Carpenter, Carpenter, Pavement, Southern Fire)  
 Bed Bugs  
 Black Flies  
 Cat Fleas  
 Cockroaches (German, American and Oriental)  
 Centipedes  
 Crickets
