### Use Areas

**Indoor Use**
- Dairy and Livestock Barns
- Kennels
- Poultry Houses
- Meat and Poultry Processing Plants
- Stables
- Zoos

**Outdoor Fogging**
Method of Application
• Conventional mechanical foggers (space spray)
• Handheld mechanical foggers
• Compressed air sprayers (surface spray)
• Aerosol generators (space spray)
• Thermal foggers
• Broadcast surface treatments
• ULV cold foggers

Best Practices when using EverGreen® 100 Synergized ULV Concentrate

Animal Premise Applications
Direct spray toward the upper portions of the enclosure above the animals, filling the room with a fine mist or fog.

Mixing Tip
When mixing add the concentrate first, than dilute with oil, then agitate. If there is good agitation in the mixing tank or unit, then the mixing order is not as important. Diluted product may look hazy. Keep product agitated as much as possible.

Contains petroleum distillates
Do not treat lawns, turf or plants. Do not treat surfaces that may be stained.

Ventilate before re-entry
Ventilation is achieved by completely exchanging air in the room or area 3 times.

Key Insects Controlled
Ants (Black Carpenter, Carpenter, Pavement, Southern Fire)
Bed Bugs
Black Flies
Cat Fleas
Cockroaches (German, American and Oriental)
Centipedes
Crickets
Darkling Beetles (Lesser Mealworm)
Earwigs
Fannia Flies
House Flies
Stable Flies
