Shockwave® is unmatched fogging concentrate technology that delivers the highest-level control combined with the benefit of NyGuard® IGR activity. Shockwave provides flushing action and quick knockdown, plus residual activity. Shockwave contains NyGuard IGR that mimics naturally occurring insect growth hormones to interfere with insect growth and development.

**Shockwave contains five active ingredients**
- Dual killing agents (Pyrethrum and Esfenvalerate)
- Dual synergized (Piperonyl Butoxide and MGK-264)
- Insect growth regulator (NyGuard® pyriproxyfen)

**Shockwave is the ideal clean-out solution for the toughest situations**
- Heavy insect populations
- Hard-to-kill insects

### Product Specifications

### Use Areas

**Indoors in Food and Non-food Areas, such as:**
- Homes
- Food processing plants
- Restaurants
- Hotels
- Schools
- Warehouses

**Outdoor Use Around Structures**
- Dumpsters
- Garbage cans
- Homes
- Public buildings
- Warehouses

**Poultry Houses**

**Transportation Equipment**
- Ships
- Trains
- Trucks
Method of Application
- Mechanical foggers (space spray)
- Thermal foggers
- Compressed air sprayers (surface spray)
- Crack and crevice injection devices
- Aerosol generators
- Power sprayers (poultry houses)

Best Practices when using Shockwave® Fogging Concentrate

Contains petroleum distillates
Do not treat lawns, turf or plants. Do not treat surfaces that may be stained.

Dilute with oil
The Shockwave label allows it to be used indoors either diluted or undiluted. Outdoors it can only be used diluted. Dilute Shockwave with refined kerosenes that meet food additive regulations as defined by CFR Title 21, 172.884.

Ventilate before re-entry
Ventilation is achieved by completely exchanging the air in the room or area 3 times.

Mixing tip
When mixing, add the concentrate first, then dilute with oil, then agitate. If there is a good agitation in the mixing tank or unit, then the mixing order is not as important.

In poultry houses
Remove animals prior to treatment. See label for full directions for use in poultry houses.

Note
Diluted product may look hazy. Keep product agitated as much as possible.

Key Insects Controlled

Shockwave is labeled for the control of insects including, but not limited to:
- Almond Moths
- Angoumois Grain Moths
- Ants
- Black Flies
- Boxelder Bugs
- Brown Dog Ticks
- Cadelles
- Carpet Beetles
- Carrion Beetles
- Cereal Beetles
- Cheese Mites

Cheese Skippers
Chocolate Moths
Cigarette Beetles
Clothes Moths
Clover Mites
Cockroaches
Coffee Bean Weevils
Confused Flour Beetles
Crickets
Dark Mealworms
Darkling Beetles
Deer Flies
Dermeist Beetles
Drain Flies
Dried Fruit Beetles
Drugstore Beetles
Earwigs
Face Flies
Firebrats
Flat Grain Beetles
Fleas
Flies
Flying Moths
Fruit Flies
Fungus Gnats
