

SUMARI[®]
ant gel bait

Eliminate the Entire Colony.

A highly palatable gel bait that helps eliminate the colony—including the queen.*

Sumari[®] Ant Gel Bait features a highly palatable bait matrix that starts killing within 24 hours to help reduce callbacks. Worker ants carry the bait back to the colony, where it is shared with the queen and other ants to help eliminate the entire colony including the queen.* Designed for use with Sumari Insecticide Concentrate, it provides a complete solution for ant baiting and perimeter treatments.

Features and Benefits

- Kills the colony and the queen*
- Starts killing within 24 hours** to help reduce callbacks
- Remains palatable for up to 90 days
- Approved for use in food handling areas while in operation

Packaging

- Clamshell unit (4 x 30 gram tube, 5 per case)

Average % Worker Mortality of Argentine Ants

What Does This Data Mean for Your Business?

Fast colony elimination means fewer return visits. Sumari® Ant Gel Bait provides delayed action that allows worker ants to carry the bait back to the colony, helping eliminate the queen and the entire colony.* Its highly palatable bait matrix remains attractive for up to 90 days to support consistent performance over time.

Average % Queen Mortality of Argentine Ants

MGK Study (2019)

The Power of the Sumari® System

Worker ants are attracted to Sumari® Ant Gel Bait and carry it back to the colony, where it is shared with the queen and other ants to help eliminate the colony.* Sumari® Insecticide Concentrate complements the bait by treating entry points and other labeled areas around the structure.

Attract and Kill

*excluding fire, Argentine, harvester, carpenter & pharaoh ants
