# Solutions for Longer Lasting Larvicide Control

Sumilarv® applies the power of residual control to make mosquito control easier. Its unique non-flushing formula remains on-site and effective for up to 150 days, setting a higher industry standard for effectiveness with a novel class of chemistry for public health. Sumilarv comes in two different dispersal forms for optimal control and ease of use in your integrated mosquito management program.

## Features and Benefits

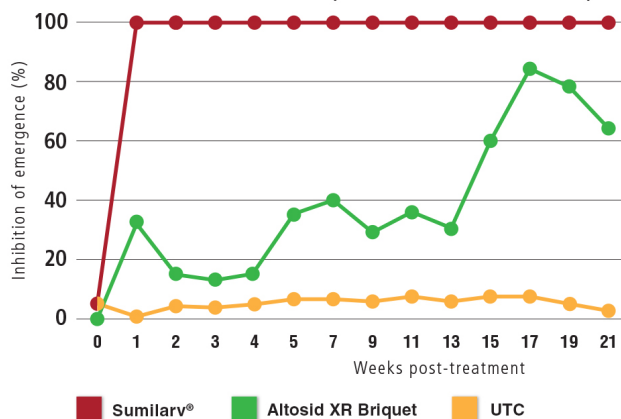

- Up to 150 days of residual control with one dose (3 WSP) in catch basins
- Unique non-flushing formula with dosing flexibility allows users to apply varying amounts of product for their desired duration of mosquito control
- Bulk granule or water soluble packets for efficient and easy application
- Effective even in areas that dry out and rewet
- Prevents adult mosquito emergence (including those that may transmit West Nile virus)

## PROVEN RESULTS FOR MOSQUITO CONTROL

In a comparison study, Sumilarv demonstrated 100% emergence inhibition of mosquitoes present in the catch basin, while Altosid XG produced a lower percentage emergence inhibition over the course of the study.

INHIBITION OF EMERGENCE BY ALTOSID XR BRIQUET AND SUMILARV 0.5G AGAINST CULEX QUINQUEFASCIATUS IN SIMULATED CATCH BASINS (8/15/2019 – 2/29/2020).

### Specifications:

- **Form:** Granule or Sachet (WSP)
- **Chemical Class:** IGR
- **Active Ingredient:** Pyriproxyfen
- **Activity:** Insect Growth Regulator
- **Key Target Pest:** Mosquitoes

### Packaging Size/ Configuration:

- **Sumilarv 0.5G**
  - › 1 kg bag
  - › 5 kg bag
- **Sumilarv 0.5G Sachet (WSP)**
  - › 25 gram WSP (sachet)
  - › 40 WSP per bag (1 kg)
  - › 10 bags per case (10 kg)

### What Drives You Drives Us

At MGK, we are continually enhancing our product portfolio to help you be successful. Our commitment to continuous improvement and innovation ensures your success now and in the future.
