MGK Expands Troika® Brand with Versatile, Broad-Spectrum Aerosol

Newly available Troika® Farm and Livestock Aerosol provides producers a flexible solution that kills over 25 insects on contact with residual control up to 4 weeks.

Minneapolis, MN – Leading insecticide manufacturer MGK is excited to announce the launch of Troika Farm and Livestock Aerosol, a synergized dual active, broad-spectrum insecticide that delivers the quick kill needed for immediate relief and provides residual control.

“Insect pressure is more than an inconvenience, it carries real economic consequences for producers,” said Kris Prentice, Vice President of Sales and Marketing at MGK. “With Troika Farm and Livestock Aerosol, we are providing an effective solution that delivers both immediate and long-lasting results. By reducing costs from insect-related stress, disease and production losses, we help producers sustain healthy herds and long-term operational success.”

Troika Farm and Livestock Aerosol has several key features producers will find valuable:

- Provides a quick kill and residual control up to 4 weeks
- For use on beef cattle, dairy cattle, goats, sheep, hogs, horses, in animal quarters and milk rooms
- Kills over 25 insects including flies, lice, mosquitoes and ticks
- Formulated with botanically based pyrethrin and synthetic permethrin
- Synergized with piperonyl butoxide (PBO) to combat metabolic resistance

The Troika brand is built on a powerful combination of two active ingredients, a botanical pyrethrin and a synthetic pyrethroid, plus a synergist, piperonyl butoxide. Together, they deliver a quick kill and residual control against a broad spectrum of insects.

Troika Farm and Livestock Aerosol is the newest addition to the Troika family, offering the same proven performance in a convenient, ready-to-use solution. Unlike many aerosols that provide only short-term relief, Troika delivers up to four weeks of residual control, helping protect operations wherever insect pressure occurs.

Check with local distribution or your MGK sales representative for availability.
