

Quick Kill with Residual Control

Multiple Actives in a Ready-To-Use Solution

Troika® Farm and Livestock Aerosol is a dual-active, synergized formula (Group 3A) that kills insects on contact for immediate relief while also providing residual control. This water-based, ready-to-use aerosol offers a versatile solution against a broad spectrum of insects and can be applied as an area spray or directly on livestock.

Features and Benefits

- Provides a quick kill and residual control up to 4 weeks
- Kills over 25 insects including flies, lice, mosquitoes and ticks
- For use on beef cattle, dairy cattle, goats, sheep, swine, horses, in animal quarters and milk rooms
- Synergized with piperonyl butoxide (PBO) to combat metabolic resistance

Packaging

- 22 ounce aerosol can (12 per case)

What does this data mean for your business?

Troika Farm and Livestock Aerosol provides effective knockdown and kill of house flies, including on surfaces treated up to 28 days earlier. This residual activity helps maintain effective insect control while reducing the need for frequent reapplication.

Always read and follow all label instructions.
