

TROIKA®
Pour-On

Multiple Actives for Fast Control

Oil-Based Formula with Flexible Application Options

Troika® Pour-On is a dual-active, synergized insecticide (Group 3A) that provides fast and effective control of insects on livestock. This oil-based, ready-to-use formulation adheres to animal hides and offers multiple application options, including as a pour-on, spray, or in backrubbers and automatic misting systems for effective insect control.

Features and Benefits

- Kills flies, lice, mosquitoes, ticks and other listed insects
- For use on cattle, horses, sheep and swine
- Oil-based for better adhesion to animal hides
- Approved for daily application, providing flexibility during increased insect pressure
- Synergized with piperonyl butoxide (PBO) to combat metabolic resistance
- Formulated with botanically based pyrethrins and synthetic permethrin

Packaging

- 1 quart bottle (6 per case)
- 1 gallon bottle (2 per case)

Pour-On Product Performance for Horn Fly Control

Note:

Three inches of rain was measured at the test site 5 days after cattle were treated, impacting residual control of all products.

Elmer Ahrens, 2026.

What Does This Data Mean for Your Business?

Troika Pour-On proved to provide fast control of flies and residual activity throughout the study. Even after three inches of rain five days following treatment, Troika Pour-On continued to provide effective fly control, helping producers protect their animals from insect pressure.
