

EVERGREEN®
PYRETHRUM CONCENTRATE

Power from Nature. Performance You Trust.

OMRI Listed insecticide powered by pyrethrins, a botanical active ingredient, for fast-acting kill of more than 140 listed pests.

Evergreen® Pyrethrum Concentrate is an OMRI Listed, broad-spectrum insecticide powered by pyrethrins (Group 3A), a botanical insecticide derived from chrysanthemum flowers. Designed for use in organic production and a wide variety of indoor and outdoor sites, Evergreen Pyrethrum Concentrate provides fast-acting kill with flexible application methods to fit a variety of treatment needs.

Features and Benefits

- Labeled for a wide variety of use sites, including residential, commercial, food handling, processing, and storage areas.
- Indoor/outdoor use on trees, shrubs, flowers and foliage plants.
- Versatile application methods including surface, space, spot, crack and crevice, foliar, and ULV applications.

Packaging

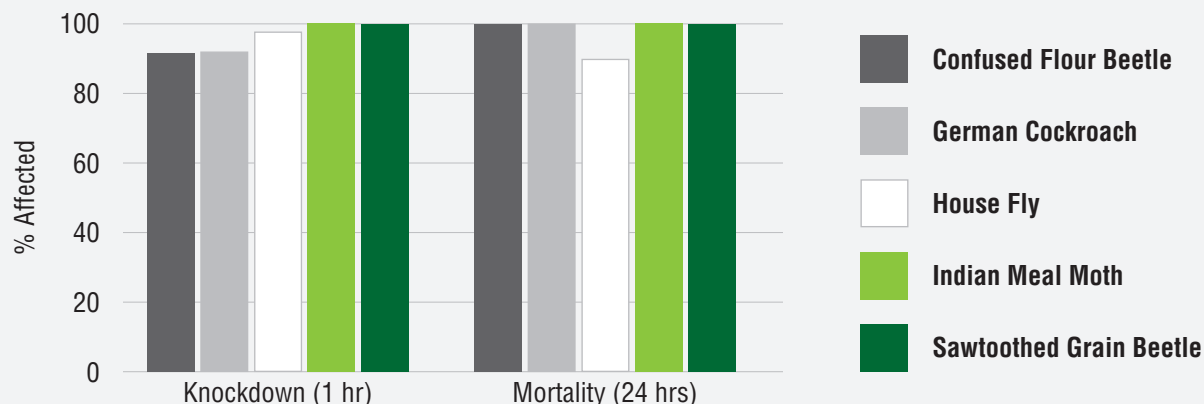

- 1 pint unit (6 per case)
- 1 gallon unit (2 per case)
- 55 gallon drum

What Does This Data Mean for Your Business?

Quickly reducing pest activity helps improve the customer experience by providing visible results soon after treatment. In this study, complete mortality was achieved within 24 hours across a broad range of listed insects.

Pyrethrum vs. Pyrethroid

What Does This Image Mean for Your Business?

Derived from chrysanthemum flowers, pyrethrum provides broad-spectrum insect control through a blend of six compounds known as esters. Each batch of pyrethrum contains a slightly different ratio of these esters, creating a complex and balanced profile, much like the subtle differences between coffee brews. In contrast, synthetic pyrethroids are mimics of pyrethrins that contain fewer chemical variants, typically based on a single pyrethrin ester.
