

Onslaught®
MICROENCAPSULATED INSECTICIDE

Microencapsulated for Lasting Impact

Long-Lasting Residual Control

Onslaught® Microencapsulated Insecticide (Group 3A) delivers long-lasting residual activity through its formulation. Controlled release technology helps release the active ingredient over time for consistent, extended control of a broad spectrum of labeled pests. Ideal for use in an integrated pest management (IPM) program. Onslaught can be tank mixed with an insect growth regulator (IGR), such as NyGuard® IGR, to help manage emerging insect populations.

Features and Benefits

- Controls 100+ insects, including mosquitoes that may transmit Zika virus
- Controls German cockroaches for up to 12 months on indoor, unsealed concrete and/or cement surfaces
- Flexible application options for indoor and outdoor broadcast treatments
- Proven rain fast performance that stands alongside leading competitors

Packaging

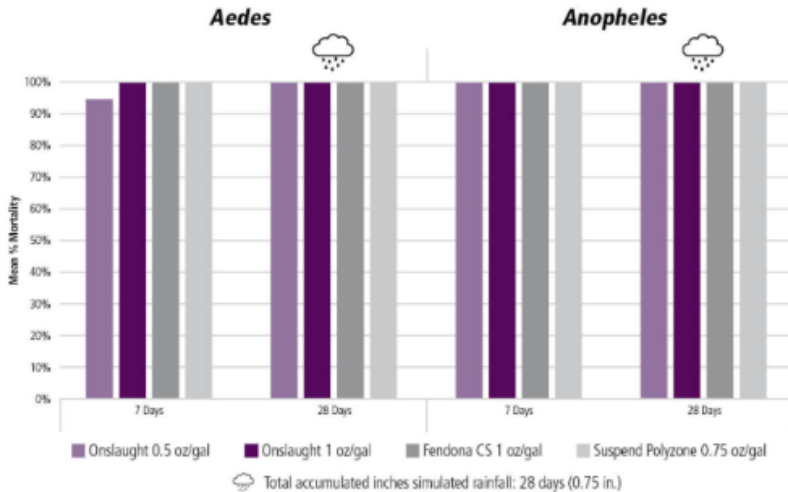

- 1 pint bottle (6 per case)
- 1 gallon bottle (2 per case)
- 30 gallon drum

What Does This Data Mean for Your Business?

Onslaught® provides long-lasting residual control against a wide variety of pests. Different sizes of microcaps in Onslaught support strong residual activity across the broad range of pests listed on the label. Larger pests like scorpions can pick up larger microcaps, while smaller capsules can be picked up by smaller pests such as ants or mosquitoes.

Always read and follow all label instructions. For any medical or safety questions, concerns or incident reports, call 1.888.740.8712.
