

ULD® BP-300

Contact Insecticide II

Concentrated Formula. Broad-Spectrum Results.

Oil-based pyrethrin concentrate effective against 60+ listed pests.

ULD® BP-300 Contact Insecticide II is an oil-based concentrate formulated with botanically derived pyrethrins and PBO. With three times the pyrethrin concentration of ULD® BP-100, BP-300 provides an effective solution against a broad spectrum of listed pests across residential, commercial and livestock environments. Labeled for indoor and outdoor applications, BP-300 offers versatile treatment options, including space sprays, direct sprays and crack-and-crevice applications.

Features and Benefits

- Contains 3% botanically derived pyrethrins (Group 3A) and 15% PBO
- Kills listed pests, including cockroaches, flies, ants, bed bugs and stored product pests
- Can be applied directly to certain livestock and as a space treatment over animals according to label directions
- Labeled for use in food-handling establishments, including federally inspected meat and poultry facilities
- Offers flexible dilution rates to accommodate different treatment needs
